

When portability
is the priority

CAPITALMEDICAL
CORPORATION

Patients are leaving the hospital sooner and DVT risk can last for 30 plus days post discharge. DJO Global introduces VenaPro, a truly portable device to help prevent post-operative DVT for moderate to high risk patients.

VenaPro is designed for optimal patient comfort and compliance.

- *No tubes or cords*
- *One button operation*
- *Weighs less than one lb*
- *Graduated and asymmetric compression*
- *Air releases to cool patients' legs*
- *USB Downloadable compliance data*
- *Re-chargeable battery (8 hour life)*
- *Applies 50mmhg once per minute*

How can I get VenaPro?

DJO Global's hospital to home program (H2HDVT) is a simple one month rental program where we handle all the billing, shipping and patient education for a completely hassle free way to protect your patients at home.

Contact your local sales representative

or Capital Medical Cooperation at **850-386-1978** to set your clinic up and start providing VenaPro systems to your patients at home.
